

## Health Report Manager

We are pleased to announce another significant milestone has been achieved with the successful integration of Health Report Manager (HRM) with Homewood Health (Guelph) in south west Ontario (SWO). HRM is a solution that enables sending facilities (hospitals and specialty clinics) to securely deliver medical record reports and diagnostic imaging reports into clinicians' certified electronic medical records (EMRs). With this successful integration, 72 of the 74 hospital sites in SWO are sending reports through HRM.

For a list of all hospitals and specialty clinics integrated with HRM and the reports that they are sending, visit OntarioMD's website: <https://www.ontariomd.ca/products-and-services/health-report-manager/sending-facilities>

The connecting South West Ontario (cSWO) Program, in collaboration with OntarioMD, and the cSWO Change Management & Adoption Delivery Partners (CM&A DPs), continue to work with the remaining two hospital sites in SWO to integrate HRM. Outside of SWO, there are already 119 locations live on HRM sending more than 1.25 million clinical reports a month to clinician EMRs.

The four CM&A DPs and OntarioMD's field team are working with clinicians to implement HRM in their practices so they can receive patient reports directly to their EMRs. Currently, across SWO, there are over 2,060 clinicians connected to HRM.

The eHealth Centre of Excellence is the Change Management and Adoption Delivery Partner (CM&A DP) for the Waterloo Wellington Local Health Integration Network (WWLHIN) and is responsible for the deployment of cSWO Program services. Our role is to work with local health service providers to facilitate the business and technical adoption of cSWO EHR Program solutions and standards into the regular delivery of care.
