

Digital Health Catalogue

Our highly qualified team of experts is here to support you with the following digital health tools and services:

eConsult

Enables primary care providers to send a secure email message to a specialist or a specialty group, and can be used to request treatment options, ask for advice or ask if a referral is needed – and receive a response back quickly... sometimes in just one day

Virtual Care

Enables providers to 'see' their patients over a secure, online communication system via chat messaging, phone or video, reducing avoidable in-person visits and improving satisfaction for providers *and* their patients

Tablets

Enables efficient screening, assessment and information management of a patient population, with information collected from the patient through a tablet in the waiting room and integrated directly into the provider's electronic medical record (EMR)

ePrescribing

Enables prescribers to create and send prescriptions electronically to a patient's pharmacy of choice, and is seamlessly integrated into a provider's EMR

EMR Tools & Coaching

EMR templates, forms and other tools provide clinical decision support at the point-of-care and improve data quality, leading to enhanced outcomes for patients, while coaching sessions help providers enhance their use of digital health technologies in clinic

eReferral

Enables providers to send standardized referral forms seamlessly and quickly direct from their EMRs to specialists and programs, as well as receive updates regarding the status of the referral

Automated Solutions

Supports providers with tools that run 24/7 in the background of health information systems to automate manual tasks, improve data quality and enable the secure sharing of information across the continuum of care
