

EMR tool for anxiety disorders and depression in adults now available for OSCAR Pro and Accuro QHR

Version for Telus PS Suite coming soon

Did you know that **more than 9 million Canadians** will be affected by a mental illness during their lifetime?

A new EMR-integrated tool from **Evidence2Practice Ontario (E2P)** is making it easier for clinicians to access information at the point of care on quality standards related to anxiety disorders and depression in adults. It offers streamlined modules to support clinicians with appropriate assessment, diagnoses, management, and transitions in care.

Features of this tool include:

Practical assistance for screening and assessment

The tool surfaces evidence-based guidance to assist clinicians in screening patients with risk factors for anxiety or depression and provides a practical approach to completing a comprehensive assessment.

Optimized guidance on management

The tool supports the use of a stepped approach with the identification of first-line therapies in alignment with patient factors and streamlines the navigation of available services and supports.

Functionalities to assist with monitoring and management

The tool trends assessment scores, tracks medication and non-pharmacological history, and makes previous encounter notes readily available.

Supports for patient self-management

The tool contains a patient and caregiver-facing printable component that clearly outlines the management approach and connects them to accessible resources and supports, both locally and virtually.

Services available

- Change management support for installation & use in EMR
- Academic detailing: 1:1 discussions with a clinical pharmacist
