# Evidence2Practice Ontario

# E2P COPD Tool

## Accessible. Actionable. Adaptable.

Our complimentary **EMR-integrated Chronic Obstructive Pulmonary Disease (COPD) tool** for **TELUS PS Suite**, **Accuro QHR** and **OSCAR Pro** offers a streamlined approach to support clinicians with appropriate assessment, diagnosis, and management, providing easier access to the necessary information at the point of care.

## Features include:

### Investigations into COPD diagnosis

Supports the confirmation of diagnosis by spirometry and captures results.

### Management supports

Contains embedded accessory instruments to measure the degree of disease burden. Tracks acute exacerbations, graphs timing, reviews and captures severity to determine the risk of future acute exacerbations.

### Medication plan management

Provides decision support related to recommended pharmacologic treatments and easy access to reference information.

### Improved patient care planning & connection to self-management supports

Contains a patient and caregiver-facing printable component that clearly outlines the management approach and connects them to accessible resources and supports, both locally and virtually.
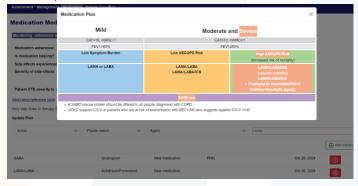

*And more!*

*Screening and diagnosis module in TELUS PS Suite*

*Management plan module in Accuro QHR*

*Medication plan module in OSCAR Pro*

## Services available at no cost:

**Change management** enables smooth adoption and effective utilization of the E2P tool:
- Tailored coaching for primary care clinicians, allied health professionals and all clinic staff
- Facilitated installation, set-up and tool training
- Review of existing workflows to maximize efficiencies

**Academic detailing** provides 1-on-1 discussions with a trained pharmacist to support clinicians in improving outcomes for patients, including:
- Diagnosis and assessing symptom severity
- Initiating and adjusting tailored maintenance therapy
- Developing a COPD management plan and accessing local patient and provider resources
