# Evidence2Practice Accessible. Actionable. Adaptable.

# **E2P Heart Failure Tool**

Medication module from Accuro QHR

Our complimentary EMR-integrated heart failure tool for TELUS PS Suite, OSCAR Pro, and Accuro QHR offers a streamlined approach to support clinicians with appropriate assessment, diagnoses, and management, providing easier access to the necessary information at the point of care..

### Features include:

#### Investigations into heart failure diagnosis

Evidence-based guidance to assist clinicians with identifying, tracking, and supporting at-risk patients.

#### **Medication plan management**

Easy access to reference information, picklists to facilitate appropriate medication selection, built-in notification flags to change medication if the patient's condition is worsening, and more.

#### Improved patient care planning & connection to selfmanagement supports

The tool contains a patient and caregiver-facing printable component that clearly outlines the management approach and connects them to accessible resources and supports, both locally and virtually.

## What clinicians are saying:

"This tool will help you to ensure that you are up to date with the way that this disease is identified, diagnosed, treated, and monitored. It's going to make you much more confident about how well you're managing this patient - and not just more confident, but I think more pleased with how you're doing it." R. DACRE, MD, CFPC

### Services available at no cost:

Change management enables smooth adoption and effective utilization of the E2P tool:

- Tailored coaching for primary care clinicians, allied health professionals and all clinic staff
- Facilitated installation, set-up and tool training
- Review of existing workflows to maximize efficiencies

Academic detailing provides 1-on-1 discussions with a trained pharmacist to support clinicians in improving outcomes for patients, including:

- Optimizing the use of natriuretic peptides for diagnosis and monitoring
- Managing drug therapy during worsening heart failure
- Connecting patients to local resources and programs
